

## Sheltair Coronavirus Policy

### General

Sheltair Aviation Safety and Human Resources teams are monitoring Novel Coronavirus (COVID- 19) outbreak and impacted areas frequently.

**Effective immediately and until further notice, the following restrictions are in effect:**

All employees and facility visitors arriving at a Sheltair Aviation facility will be asked to confirm they have not visited a prohibited area (Currently Mainland China, South Korea, Iran and Italy), are not symptomatic of, nor had close contact with a person suspected of, or confirmed as having COVID-19. The table below outlines the authorized activities based on the response:

Employees, contractors and visitors who have:	Are:
Been diagnosed with COVID-19, and have not been deemed recovered by a physician	Prohibited from entering Sheltair Aviation facility until deemed recovered by a physician.
Traveled from a prohibited location (defined below) within the past 14 days Had close contact with others who have traveled from a prohibited location and are diagnosed with, or are symptomatic of COVID-19  Had close contact with others who have been Diagnosed with COVID-19	Prohibited from entering Sheltair Aviation facility until 14 days after last contact and remain asymptomatic. And, must notify their direct supervisor, to include the date the individual exited the affected area (as applicable), and confirmation they are asymptomatic.

## Controlling COVID-19

**Handwashing is the single most important infection control measure.** Wash hands often with soap and water for at least 20 seconds, especially after touching potentially contaminated surfaces. *(\*Please see effective CBC cleaning products attached at the end of this document.\*)*

- If soap and water are not available, use an alcohol-based hand sanitizer with at least 60% alcohol content. Always wash hands with soap and water if hands are visibly dirty.
- Avoid touching your mouth, eyes, and nose with unwashed or gloved hands.
- Unless your job requires you to tend to sick travelers, avoid close contact with people who are sick.
- Stay home when you are sick.
- Cover your cough or sneeze with your elbow or a tissue, then throw the tissue in the trash.
- Clean and disinfect frequently touched objects and surfaces according to established company protocols.
- Wear disposable gloves when touching body fluids (such as blood, vomit, or diarrhea) or potentially contaminated surfaces, such as in bathrooms. Note that gloves do not replace proper handwashing.
- Treat all body fluids (such as blood, vomit, or diarrhea) as if they are infectious.
- Remove gloves carefully to avoid contaminating yourself or your clothing.
- Properly dispose of soiled gloves.
- Sanitize door handles, elevator buttons/panels, railings, carts and common bathrooms every 2-3 hours.

**With regard to the use of facemasks, CDC provides the following guidance:**

*“CDC does not recommend that people who are well wear a facemask to protect themselves from respiratory illnesses, including COVID-19. You should only wear a mask if a healthcare professional recommends it. A facemask should be used by people who have COVID-19 and are showing symptoms. This is to protect others from the risk of getting infected. The use of facemasks also is crucial for health workers and other people who are taking care of someone infected with COVID-19 in close settings (at home or in a health care facility).”*

As always, airport and airline workers should always wear the personal protective equipment (PPE) recommended by your employer for the work you do and dispose of waste using recommended procedures. Speak to your supervisor if you have concerns related to your job responsibilities.

**Please review additional information regarding Symptomatic Protocols:**

**SYMPTOMATIC<sup>1</sup>**

Risk Category	Movement Restrictions and Public Activities	Medical Evaluation	Travel
High risk	Immediate isolation.	Medical evaluation is recommended; diagnostic testing for 2019-nCoV should be guided by CDC's <a href="#">PUI definition</a> but is recommended for symptomatic people with a known high-risk exposure. If medical evaluation is needed, it should occur with pre-notification to the receiving HCF and EMS, if EMS transport indicated, and with all recommended <a href="#">infection control precautions</a> in place.	Controlled; air travel only via air medical transport. Local travel is only allowed by medical transport (e.g., ambulance) or private vehicle while symptomatic person is wearing a face mask.
Medium risk	Immediate isolation.	Medical evaluation and care should be guided by clinical presentation; diagnostic testing for 2019-nCoV should be guided by CDC's <a href="#">PUI definition</a> . If medical evaluation is needed, it should occur with pre-notification to the receiving HCF and EMS, if EMS transport indicated, and with all recommended <a href="#">infection control precautions</a> in place.	Controlled; air travel only via approved air medical transport. Local travel is only allowed by medical transport (e.g., ambulance) or private vehicle while symptomatic person is wearing a face mask.
Low risk	Recommendation to avoid contact with others and public activities while symptomatic	Person should seek health advice to determine if medical evaluation is needed. If sought, medical evaluation and care should be guided by clinical presentation; diagnostic testing for 2019-nCoV should be guided by CDC's <a href="#">PUI definition</a>	Recommendation to not travel on long-distance commercial conveyances or local public transport while symptomatic
No Identifiable Risk <sup>2</sup>	No restriction	Routine medical care	No restriction

### Novel Coronavirus (COVID-19)—Fighting Products<sup>i</sup>

The American Chemistry Council's (ACC) Center for Biocide Chemistries (CBC) has compiled a list of products that have been pre-approved by the U.S. Environmental Protection Agency (EPA) for use against emerging enveloped viral pathogens and can be used during the 2019 novel coronavirus (COVID-19) outbreak. This product list is not exhaustive but can be used by business owners, health professionals, and the public to identify products suitable for use against COVID-19.

REScue Wipes One Step Disinfectant Cleaner & Deodorizer	Virox Technologies, Inc.	74559-10

As a public service, CBC is maintaining this list of antimicrobials that have proven to be effective against stronger pathogens, such as norovirus or ebola. By publishing and maintaining this open list, CBC relieves federal, state, and local health officials' resources in order to focus on other aspects of the important effort to limit spread of this new disease. Listing is voluntary and compliance with EPA's "emerging viral pathogen" guidance for antimicrobial products is verified by CBC. CBC will be working with federal and state officials to disseminate the list and make it accessible to all those who need to be in the know.
